

For Insect Bites

Descriptions:

Moskilex stick soothes skin irritation caused by insect bites. Its specially devised formula contains of a complex of ingredients to provide optimal action, and ultimately – relief. Due to its roll-on form, the bottle allows for a comfortable product application and your hand remains clean. The product is alcohol free.

Recommendations:

Moskilex is a perfect cosmetic for active people who spend time in the fresh air (and who are thus vulnerable to insect bites), and for a quick bites symptoms mitigation in children over 3 years of age.

method of use:

Apply a small amount of the product on irritated skin. Leave until fully absorbed. May be applied repeatedly. For external use only.

Capacity:

15 ml

Composition:

Aqua, Aloe Barbadensis Extract, D-Panthenol, Glycerin, Tocopheryl Acetate, Allantoin, Hydroxypropyl Cellulose, Menthol, Nonoxynol-9, Lactic Acid, Sodium Benzoate.

Active substances: Aloe, allantoin and marigold extract contribute to natural healing processes and tissue regeneration.

D-Panthenol firmly moisturizes and alleviates irritated and reddened skin

Vitamin E restores the skin's hydrolipid balance, thus increasing its protection against external factors.

Menthol provides a soothing, cooling effect and has analgesic properties.
