

## Provita Probiotic

### Descriptions:

Provita Probiotic contains beneficial probiotic bacteria, such as *Enterococcus faecium*, *Bacillus licheniformis*, and *Bacillus subtilis*, which support the proper functioning of the digestive system and aid in the restoration of the intestinal microbiota in animals. It is intended for use to stabilize the bacterial flora during the recovery period, as a dietary supplement for animals with gastrointestinal and pancreatic dysfunction, during intestinal microbiota disturbances, and during and after antibiotic therapy, as well as in response to various stress factors.

### Recommendations:

Stabilization of the intestinal bacterial flora during: – recovery and after illnesses associated with disturbances in the gastrointestinal flora, as well as after the oral administration of chemotherapeutic agents (e.g., antibiotics), – changes in diet, particularly in young animals, – exposure to various stress factors. Improvement of the animal's overall condition and enhancement of its immunity.

### method of use:

The preparation should be administered using a dosing syringe once a day for 7 days:

Kittens and puppies – 1 ml

Cats and dogs up to 20 kg – 2 ml

20-40 kg – 3 ml

Dogs over 40 kg – 4 ml

The preparation can be used directly or mixed with food.

### Capacity:

15 ml dosing tube syringe

### Composition:

Ingredients: unrefined sunflower oil, dextrose, inactivated yeast, *Enterococcus faecium* biomass ( $1 \times 10^9$  CFU/g), *Bacillus licheniformis* and *Bacillus subtilis* ( $9 \times 10^6$  CFU/g) rich in protein. Dodatki: dietary: 3a672a / Vitamin A (900,000 IU/kg), 3a700 / Vitamin E (4,500 mg/kg), 3a820 / Vitamin B1 (1,400 mg/kg), 3a826 / Vitamin B2 (1,100 mg/kg), 3a831 / Vitamin B6 (370 mg/kg), 3a837 / Vitamin B12 (90 mg/kg). Składniki analityczne: Crude protein: 1.6%, Crude fat: 47.0%, Crude fiber: 0.3%,

Crude ash: 3.6%.
